I am an aspiring software developer hoping to obtain an internship role where I can leverage my skills in software development, including experience in Python, PHP, Docker, Kafka, HTML and CSS to contribute to real-world projects and continue to grow as a developer. I've just completed my final year of study and working on getting an internship opportunity

## SKILLS

Programming Languages: Python, HTML, CSS, JavaScript, PHP, Java

Technologies: Docker, Kafka, Git

Libraries: Django, Laravel

Experience working with Linux Operating System(Ubuntu).

## EXPERIENCE

MAY 2023 – JULY 2023

UJUZI CRAFT

Software Development Intern

- Maintained existing laravel applications in the company and helped build a new laravel application to completion.
- Worked on automation of tasks using python, mostly using Selenium Webdriver and a bit of puppeteer.
- Worked on a WordPress application.

## EDUCATION

Bachelor of Computer Science, Jomo Kenyatta University of Agriculture and Technology (Expected Graduation: 2024)

## PROJECTS

2024- PRESENT

Working on my final year project, which is a web application, built using Django web framework. It is a web application using computer vision and chatbot technology to help university student's deal with depression systems. Includes ability to track one's trends, set a journal and seek further assistance from a school counsellor if needed.

2023 JANUARY – 2023 APRIL

Worked on a school chat application that would help students contact lecturers on an application dedicated to academics. Lecturers would be able to communicate with students in rooms and provide reading material in the form of file upload. One to one communication is also provided if need be.
